For payment**

For payment

QPAY → Non Customer pay/New gas bill connection
CPAY → Customer pay /Gas Bill Payment
LPAY → Login Pay
APAY → Mobile Pay
OPAY → Mobile Pay Other Payment

api_v3/ebs/quick_payment
quick payment link

user_account_info - my accounts
quick_meter_reading_insert- quick meter reading
gas_account_meter,meter_reading_insert --> login meter reading(ebs_mobile_functions)
app_payment_link--> login payment
meter_reading_list--> meter reading list view

http://json.parser.online.fr/

there will be 2 links
1.first we will give the payment link like below

o/p:
"https://secure.paytabs.com/payment/page/599F3AC582E45A207CAB5F31212A0473776DCEDEAAC5A8010E2C6A2C"

2. then he will click this below api to get the below output and payment will be generated and from here he will generate the receipt.
    http://40.120.88.200:8269/api_v3/ebs/quick_payment_success_link

o/p:
{
"status": true,
"receipt": "http://40.120.88.200:8269/my/payment/print/2728036",
"file_name": "TST2231401378043",
"code": "GPAY-20221110174252",
"amount": 200.0,
"message": "Payment Processed sucessfully"
}

invoice lu voided

payment lu void
